

Edition-Index 3: Place names in the *Compilation 'notitia dignitatum'* (*Cnd*)

The following is a list of all the place names in the *Cnd* - that is, the names of settlements (towns, forts), regions (empires, praetorian prefectures, dioceses, provinces, tracts, frontiers), natural features (mountains, rivers, seas, oases), structures (castles, frontier wall, pyramids) and foreign territories ('*barbaricum*'). The list is arranged in alphabetical order.

The place names are listed as in the following seven examples:

Names of Places	Regional locations and types	<i>Cnd</i> references
Abila	Phoenice Libani	
Achaia	<i>prov.</i>	
Dacia	<i>dioec.*</i>	
Oriens	<i>pars imperii, pp./mm., dioec.</i>	
Apadna	Osrhoena	
= Apadna	Mesopotamia	
Resaina <i>changed to</i> Theodosiopolis	Mesopotamia	
Theodosiopolis <i>changed from</i> Resaina	Mesopotamia	
Adatha	Phoenice -?-	
Aballava	<i>dioec.-Britanniae</i>	
Limes audiensis	Mauritania -?-	
Auzia (Mauritania sitifensis)		

which are interpreted as follows:

1. The first column contains the names of places, as defined above.
2. Place names, except the names of regions and the names of the two capitals (*Roma* and *Constantinopolis*), are followed, in the second column, by the name of the province in which the entity was located according to a statement in the *Cnd* or, where there is no such statement, according to other contemporary evidence as, for example, *Abila (Phoenice libani)*.

Place names that are those of regions are followed, in the second column, by the name of the type of regional unit (*pars imperii, dioecesis, provincia, regiones*). This identification may be generally useful but is especially required to distinguish different regions that shared the same name, as, for example: Oriens (*pars imp.* and *dioec.*), Aegyptus (*dioec.* and *prov.*), Macedonia (*dioec.*, and *prov.*), and Africa (*dioec.* and *prov.*). Where the provinces of a diocese named in one list in the *Cnd* were also partly or wholly included in a diocese of a different name in another list in the *Cnd*, the two diocesan names are followed by an asterisk (*) as, for example, *Dacia dioec.** indicating that the provinces listed under this diocesan heading are listed elsewhere, together with other provinces, under the diocesan heading *Illyricum*. Some geographical names are followed by the abbreviation *pp.* or *mm.*, referring to the fact that the name occurs in the position title of a *praefectus praetorio* or *magister militum*.

3. Where the same place name occurs in two or more agency lists, the name is repeated for each separate province and the repeated names are linked with = as, for example, *Apadna (Osrhoena) = Apadna (Mesopotamia)*.
4. Where a place name was changed and both names are recorded in the *Cnd*, the two are separately listed and the change is indicated in each case as, for example: *Resaina (Mesopotamia) changed to Theodosiopolis* and *Theodosiopolis (Mesopotamia) changed from Resaina*.
5. Where the place name refers to an entity whose precise location is unknown and is stated in the *Cnd* to have existed in a province whose name, or the first word of whose name, was shared by two or more provinces, the name of the province in brackets is followed by -?- as, for example, *Adatha (Phoenice -?-)* indicating that it is uncertain whether the entity existed in *Phoenice* or in *Phoenice libani*.
6. Where the name of the province in which the entity was located is not known, the place name is followed, in brackets, by the name of the diocese in which it is stated in the *Cnd* to have existed as, for example, *Aballava (dioec.-Britanniae)*.
7. Where the name of a frontier is derived from the name of a settlement whose name does not occur in the *Cnd*, the name of that settlement is added on a separate line and is followed, in brackets, by the name of the province in which that settlement is known to have been located as, for example: *Limes audiensis (Mauritania -?-) - Auzia (Mauritania sitifensis)*.

The form of each place name in the list is either the only one that exists or, where there are several, is the form most commonly used and this is not always the form that exists in the *Cnd*, which also often has several forms of the same place name, sometimes within the same agency list. The problem, and the method adopted here, are best described by A.H.M.Jones¹.

Names of Places and Regions	Regional locations and types	<i>Cnd</i> references
Aballava	<i>dioec.-Britanniae</i>	154.30
Abila	Phoenice libani	62.h, 63.8
Abocedo	Thebais	56/7.32
Abrincas	Lugdunensis secunda	150.k, 151.10
Abusina	Raetia secunda	147.13
Acadama	Syria salutaris	64.l, 65.7
Acavatha	Syria salutaris	64.m, 65.8
Achaia	<i>prov.</i>	1/2.27, 6.5, 39.a, 39.b, 40.1, 40.3, 40.14
Acimincum	Pannonia secunda	140.f, 140.p, 141.6, 141.15
Ad cohortem gallicam	Gallaecia	156/8.46
Ad Flexum	Pannonia prima	144.b, 144.k, 145.2, 145.10
Ad herculem	Pannonia secunda	140.t, 141.19
= Ad herculem	Valeria ripensis	142.k, 143.10, 143.24
= Ad herculem	Pannonia prima	144.h, 145.8
Ad herculem => <i>Castra</i>

Ad militare	Valeria ripensis	143.23
Ad novas => <i>Novae (Moesia prima)</i>		
Ad novas	Pannonia secunda	140.h, 141.8, 141.20
Ad statusas	Valeria ripensis	142.u, 143.20, 143.25
Adada	Syria salutaris	64.i, 65.5
Adatha	Phoenice -?-	62.n, 63.13
Admatha	Palaestina salutaris	59.16

¹ Jones, A.H.M., *The cities of the eastern Roman provinces*. (2nd edn., Oxford, Clarendon Press, 1971) pp.vii-viii:

"I have used the traditional spellings of names sufficiently well known to have one, and have transliterated the rest according to the time-worn conventions, [...]. But before transliterating I have in very many cases had to choose which form of a name to adopt. There are two principal difficulties in establishing the 'correct' form of an ancient name. In the literary sources - by which I mean anything that has come down to us by manuscript tradition - there are variations due to the caprice of the author and even more to the inaccuracy of scribes. Some of these variations may justifiably be termed 'mis-spellings', but it is not always easy to say which of the variants is the 'correct' form. In the second place even in first-hand official sources - inscriptions, papyri, and coins - there are considerable variations. Fixed spelling, especially for place-names, is a modern fad, and the ancients were quite content to spell a name half a dozen different ways. This applies particularly to Greek transliterations of barbarian names, which often contained phonetic elements for which the Greek alphabet did not cater. It would obviously be impossible in a work already overloaded with proper names to give every variant of each, and I have had to select one. I have endeavoured to the best of my ability, by following the inscriptions, papyri, and coins, to choose the 'correct' or one of the 'correct' forms, but in very many cases my choice has been perforce somewhat arbitrary, especially where a name occurs only in Byzantine sources, which are particularly luxuriant in vagaries of spelling. I can therefore only express my sympathy for the reader who, wishing to find Silyum (the form attested by the coins), looks for Syllium (the form used in nearly all the literary authorities), or who, searching for Gdammaua (which is vouched for by an inscription), first tries Gdanmaa (another inscription), Ecdaumaua (Ptolemy), Glauama (Hierocles), Galbana or Galmana (the Notitiae), Gdamautum (the Acta of Chalcedon), or even Egdatia (the Peutinger Table). I may also point out that the terminations of many place-names are unknown, since in the sources the ethnic only occurs, but have for convenience been arbitrarily supplied."

Names of military units and entities related to places, nations and tribes

The following is a list of all the words, among the descriptive names of military units, and one agency entity, which are connected with the names of places or nations and tribes. In the names of military units, the words related to places indicate either the name of the place where the unit originated, or the name which the place acquired from the unit located there.

The name of a nation or tribe existing initially or primarily outside the Roman state is followed by the name, in *italics* and brackets, of the modern state or states in which most of it was located in the late 4thC.
